

Entry 05 Mark Hazen

20" European Rolling Pin (1 3/8" Diameter)

Rolling surface is Rock Maple, Jarra dividers and spalted maple handles. I turned a 3/4" tenon on the rolling surface and then drilled the Jarra and spalted maple. Turned the handles true to the drilled hole then glued it up and remounted for final turning. First time I have done this sort of laminated turning so it was a fun project. Interesting aside - the Jarra is from a BBQ stand I brought back from Australia in 2002.
